

VINAY REDDY

Technical Lead | Mobile Engineering (iOS, Flutter) | Full Stack | Applied AI, GenAI | AI Product Engineering

vinayreddy.ace@gmail.com | [+91-9513368689](tel:+91-9513368689) | github.com/vinayace | linkedin.com/in/vinay-reddy-2b44a4144

PROFESSIONAL SUMMARY

Technical Lead with 11+ years of experience delivering iOS, Flutter, Android, backend and full-stack products across healthcare, mobile security, IoT mobility, fitness, enterprise and e-commerce-style platforms. Core strength remains mobile engineering with Swift, Objective-C and Flutter, expanded into Node.js, Express.js, Next.js, FastAPI and product/backend ownership. Also, focused on Applied Generative AI, building practical AI services including rule-assisted GenAI security analysis, traditional ML risk scoring, RAG-style knowledge assistants and agentic workflow automation. Experienced in architecture, SDK development, Agile delivery, sprint planning, mentoring, stakeholder collaboration, release planning and AI/product solution design.

TECHNICAL SKILLS

Mobile Engineering	iOS, Swift, Objective-C, Flutter, Android, React Native, SDK Development, Mobile Architecture
Full Stack & Backend	Next.js, Node.js, Express.js, REST APIs, FastAPI, Python, MongoDB, SQL, GraphQL, AWS, Firebase, Crashlytics, GitHub, CI/CD, Docker, Swagger, Postman
Applied AI / GenAI	Python, Generative AI, LLMs, Gemini, OpenAI API, Prompt Engineering, RAG, AI Agents, Agentic AI, LangChain, FAISS, Scikit-learn, XGBoost, TensorFlow, PyTorch
Architecture	System Design, Technical Architecture, Solution Architecture, Clean Architecture, MVC, MVVM, SOLID, API Design, Performance Optimization
Cloud / DevOps	Git, GitHub Actions, Bitrise, Docker, AWS Lambda, S3, EC2, Firebase, CI/CD
Leadership / Product	Engineering Leadership, Technical Architect, Solution Architect, Sprint Planning, Agile/Scrum, Jira, Story Estimation, Roadmap Coordination, Stakeholder Communication, Release Planning, Product Development, Mentoring, AI Product Thinking

APPLIED AI ENGINEERING PROJECTS

ProtectUs AI Security Assistant: Applied GenAI for mobile security SDK: rule engine first for known spam/blacklisted indicators; Gemini-based reasoning for ambiguous SMS/call/browser threat cases; returns BLOCK/WARN/ALLOW decisions with red flags and explanations.

Tech: Python, FastAPI, Gemini 2.5 Flash, Prompt Engineering, Rule Engine, JSON APIs

Insurance Risk Predictor: Traditional AI service that predicts insurance claim risk/fraud probability and exposes it through a REST API for downstream product workflows.

Tech: Python, Pandas, Scikit-learn, Random Forest/XGBoost, FastAPI, Uvicorn

Healthcare Knowledge Assistant / RAG Concept: Healthcare assistant design for answering user/provider questions from trusted medical or policy documents using retrieval-grounded LLM responses and safety disclaimers.

Tech: RAG, Embeddings, Vector Search, LangChain/FAISS, Agentic AI, Gemini/OpenAI, FastAPI

PROFESSIONAL EXPERIENCE

Expleo Global Solutions — *Principal Engineer / Technical Lead* | Jun 2025 - Present

- Key contributor to [ProtectUs](#), a security-focused mobile SDK integrated with banking applications for Ireland-based clients.
- Architecting, building and releasing Android and iOS SDK capabilities for call blocking, message filtering and browser-level threat prevention.
- Maintaining and delivering core mobile engineering ownership while expanding solution design into applied AI-assisted security analysis and intelligent decision support.
- Collaborating across product, backend, QA and client stakeholders for SDK releases, integration quality and production readiness.

Tech Stack: iOS, Android, SDK Development, Swift, Flutter/Native Mobile, Backend APIs, Security SDK, Agile, Applied GenAI, Agentic AI

Carelon Global Solutions — *Lead Application Engineer & Backend Interface Implementation* | 2020 - 2024

- Worked on [Elevance Health](#), contributing to mobile and backend delivery for a large-scale healthcare product used by millions.
- Architected modular and maintainable mobile codebases; improved productivity through clean coding practices, mentoring and code reviews.
- Integrated iOS, Flutter and Node.js modules while optimizing cross-platform performance and backend communication.
- Collaborated with product owners, UX, QA and backend teams to deliver reliable healthcare product releases.
- Facilitated Agile ceremonies including sprint planning, daily stand-ups, retrospectives, roadmap estimation and release coordination.
- App Link: [Sydney Health App](#)

Tech Stack: Swift, Objective-C, Flutter, Node.js, MongoDB, REST APIs, Git, Agile, Healthcare Domain, Applied GenAI

Infosys Ltd. — *Lead System Engineer / Lead Mobile Application Developer* | 2019

- Developed features for [InfyMe](#) enterprise app serving 200K+ employees across performance, events, payroll and employee service modules.
- Delivered iOS features using MVC architecture and collaborated in Agile delivery teams.
- Participated in stakeholder demos, client reviews and App Store deployment activities.

Tech Stack: Objective-C, Swift, Core Data, REST APIs, Jira, Git

Bounce / Metro Bikes — *Senior Mobile App Engineer* | 2017 - 2018

- Built [Bounce App](#) and [WickedRide](#) from scratch, working closely with founders and core product teams.
- Led full iOS development for an IoT-based mobility and bike rental platform.
- Implemented trip booking, real-time GPS, maps integration, push notifications and offline reliability improvements.
- Defined scalable API contracts with backend teams and set up crash monitoring and analytics for product quality.

Tech Stack: Swift, Objective-C, Google Maps SDK, Firebase Crashlytics, Node.js, REST APIs, Git, IoT Mobility

Codesnbytes Solutions — *Mobile App Developer* | 2015 - 2017

- Led end-to-end iOS development for [NimNim](#) Laundry and Driver apps supporting laundry operations in the USA.
- Built **VOW Cabs** modules for taxi operations in Sri Lanka, including maps, location services and payment integration.
- Delivered [WallPostERP](#) CRM modules for HR, task management, finance tracking and enterprise workflow use cases.

Tech Stack: Objective-C, Swift, Java, REST APIs, Git, Maps, Payments

INDUSTRY EXPERIENCE

- **Mobile Security SDK / Banking Protection:** ProtectUs
- **Healthcare:** Sydney Health App
- **IoT Mobility / Bike Rental:** Bounce App
- **Fitness:** Camp Gladiator
- **Enterprise Employee App:** InfyMe
- **E-commerce / Taxi / CRM Products:** NimNim, VOW Cabs, WallPost Software

EDUCATION

B.Tech in Computer Science - JNTU, Anantapur
